AnotherBall 2.0 - the classic is ever alive. The arkanoid-like game for PalmOS.

Last modified on the 18-th of January, 2003

About the game

Finally you have your favourite Arkanoid for Palm OS! We offer you the AnotherBall 2.0 (the classic is ever alive) game for Palm OS, which is a classic game with a lot of bonuses and interesting levels. AnotherBall 2.0 (the classic is ever alive) has two versions: for devices with color screen and for devices with black and white screen. This is a very interesting game! You will never give up this game!

Demo-version limitations: Demo-version of the game has only 4 levels.
To enable other levels register your game. For this purpose exit the game and run it again. You will see a window, where you should enter the registration code. Be attentive! Registration code is case sensitive.

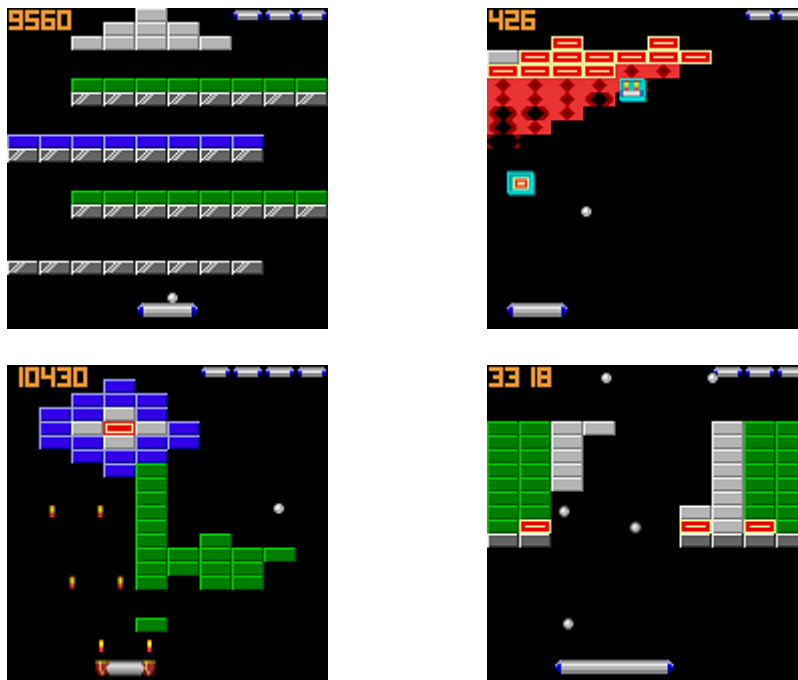

Installation

1. Run Install Tool from Palm Desktop folder on your desktop PC. To do it, click twice the left button of the mouse on the instapp.exe file in Palm Desktop folder.

2. Choose one of the following files which suites your device (if your device has low-resolution screen, we recommend you to use the game version without hi-resolution support because of smaller file size).
    *   AnotherBall_hi-res_Color.prc - color version with high-resolution support;
    *   AnotherBall_hi-res_Gray.prc - grayscale version with high-resolution support;
    *   AnotherBall_low-res_Color.prc - color version without high-resolution support;
    *   AnotherBall_low-res_Gray.prc - grayscale version without high-resolution support.

3. Synchronize (perform HotSync operation) your Palm device and a desktop PC. When synchronization is completed the game will be installed on your device.

How to play

To start the game, tap on its icon on the application screen. The object of AnotherBall is to earn as many points as possible. The main window of the game looks like one of these:

You should move the platform to reflect the ball. The ball brings down blocks. Tap the platform to start the ball in the beginning of the game. Use stylus or the "Date Book" and "Memo Pad" application buttons on the device case to move the platform. Use two other application buttons to fire (if you catch the special bonus). You will go to the next level if you bring down all blocks.

You can see your score in the left top corner of the screen.

You can see the number of lives in the right top corner of the screen. If the ball falls down by the platform you will lose one life. You will get an additional life if you earn 10 000 points.

Blocks

There are different types of blocks to be brought down:

1. common blocks (grey, green or blue)
2. glass blocks – they first are invisible. They become visible after first collision with the ball.
3. steel blocks – they can't be brought down. They are obstacles. They make the game more difficult.
4. explosive blocks – when the ball collides with it, this block explodes with all adjacent blocks
5. hard blocks - the ball must collide with them several times to bring them down. You can see on the block how much times the ball must collide with it to bring it down.

Bonuses

In addition, when you bring down some blocks, bonuses fall to the platform. You may catch these bonuses with the platform. There are following bonuses in the game:

- the platform is be able to fire. To fire tap the platform or press the "Address" and "To Do List" application buttons on the device case.

- makes the platform wider

- the ball becomes fire and burns down the block that it collides with and all adjacent blocks

- the ball begins moving slowly

- the ball goes through all blocks in its way removing them

- the ball sticks to the platform

- all explosive blocks explode

- amount of explosive blocks increases

- amount of balls doubles

- amount of lives increases by one

- all glass blocks become visible and all hard blocks (the ball must collide with them several times to bring them down) are brought down after one collision with the ball

- you go to the next level

- you lose a life

- the platform becomes narrow

- the platform becomes small, loses the possibility to fire (if you have this bonus) and the ball stops sticking to the platform (if you have this bonus)

- the ball becomes small

- the ball becomes fast

If you catch some bonuses one after another, they act simultaneously.

Good luck!
Put your score in the first line of the high scores table!

Uninstallation

To uninstall AnotherBall from your device tap Application > Menu > Delete. Then choose the AnotherBall line and tap Delete button.
