  - [Styles](#)
- [Edit Mode](#)
- [Edit Categories](#)
- [Edit Menu](#)
- [Syntax Help](#)

## Index Page ^

You are now in hyper-text Wiki browser.

After you first open it, HWiki will ask you if you want to generate index page that contains links to all existing memos. This index page is named WikiIndex.

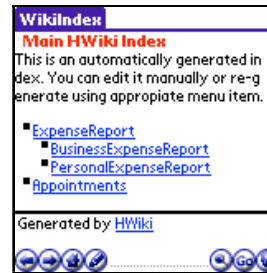

After that each time you launch HWiki you will see index page at first.

You can scroll text up and down, click on [links](#), edit the page, create new pages, rename and delete pages, change styles, settings and etc. using the toolbar or menu.

For example, you can modify the list of your memos like this:

## Toolbar ^

Toolbar at the bottom of the page provides you with certain functionality:

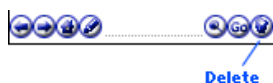

Access to navigation functions, such as [Back](#), [Forward](#), [Home](#).

Pressing [Edit](#) toolbar button will launch the text editor to edit the current memo.

To go to a certain WikiWord, you can just type its name in toolbar [Entry field](#) at the bottom of the screen and press the [Go](#) button.

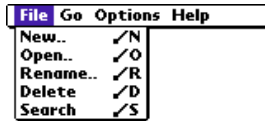

Clicking the garbage can icon on the toolbar [Delete](#) the current memo.

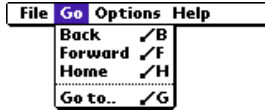

## Browser Menu ^

Menu at the top of the screen provides access to:

#### File menu:

- **New..** - create a new HWiki document;
- **Open..** - open the list of HWiki documents (existing memos);
- **Rename..** - rename the HWiki document;
- **Delete** - delete the current memo;
- **Search** - not yet implemented.

#### Go menu:

- **Back, Forward, Home** - navigation functions;
- **Go to..** - Go to the selected memo.

#### Options menu:

- **Preferences..** - change program preferences;
- **Styles..** - define font style and text formatting;
- **Reset to Defaults** - resets preferences to default values;
- **Generate Index** - generate a new WikiIndex file.

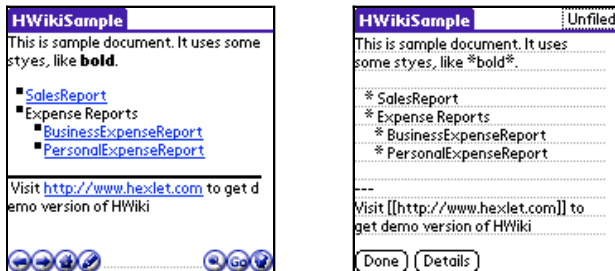

#### Help menu:

- **Index** - HWiki help;
- **Support** - [support](#) information;
- **About HWiki** - copyright information.

## Edit Mode ^

When you switch to edit mode:

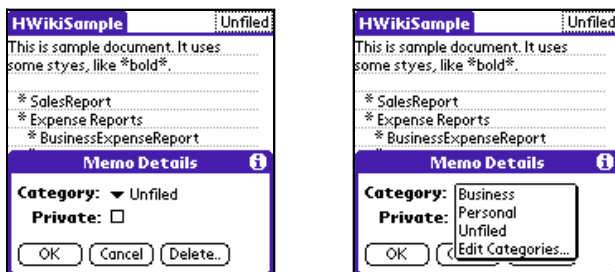

You can modify your memos or index page to make them look nice and more useful. For this purpose you can use our [Syntax Help](#).

When you are done with editing, just press the Done button and return to the browser mode.

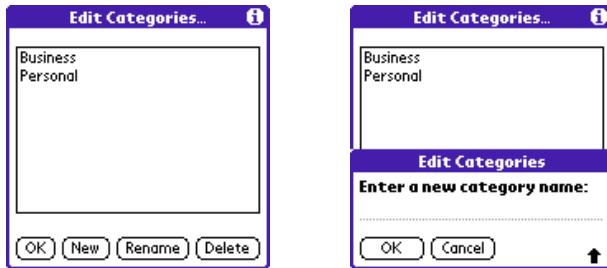

## Edit Categories ^

If you press the Details button, you can select category for you memo and mark it as private.

The category displayed on the Memo List screen will be assigned to new Memos automatically.  
There are two ways of changing the category of a memo:

1. Select a new category in the Memo Details dialog.
2. While in the edit mode, select a new category from the pick list.

## Edit Menu ^

Menu at the top of the edit mode screen provides access to:

**File** menu:

- **Rename..** - rename the current memo.

**Edit** menu:

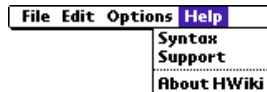

- **Undo** - undo the last action;
- **Cut** - cut the selected text;
- **Copy** - copy the selected text;
- **Paste** - paste the selected text;
- **Select All** - select all text in the memo;
- **Keyboard** - launch the virtual keyboard;
- **Graffiti Help** - bring up the graffiti prompt.

**Options** menu:

- **Font..** - change the font face.

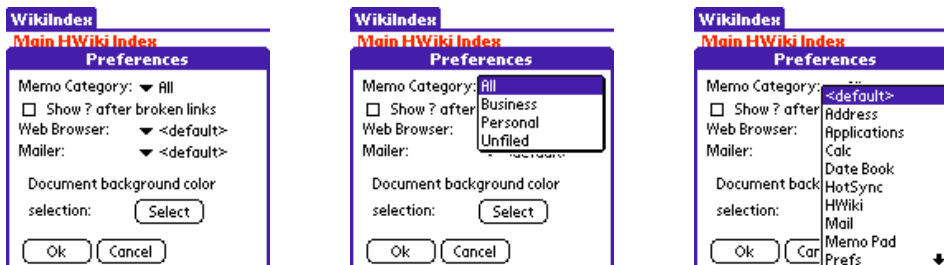

**Help** menu:

- **Syntax** - help on [HWiki Syntax](#);
- **Support** - [support](#) information;
- **About HWiki** - copyright information.

## Preferences ^

Allow you to select the Memo Category, Web Browser, Mailer and document background color.

## Styles ^

Allow you to change the default style and font face for different types of elements of text, such as heading levels, links, bold, italic and etc.

There are two ways of choosing the color of the element:

- 1. Palette
- 2. RGB
