

# MiniBloodPress – 5.0 Shareware-Version

(c) Sylvia Zedewitz, 2001-2004, [palmianer@s-ze.de](mailto:palmianer@s-ze.de)

## Description:

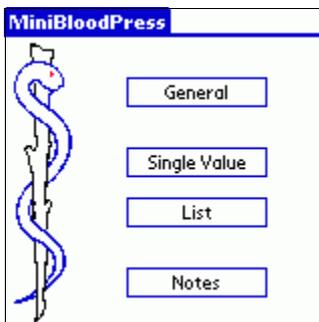

This program keeps your blood pressure values!

You can export and print the data for your doctor.

## Installation:

Please install “L\_MiniBloodPress-SW.prc” as ever, then tap the "Install M-BP"-Icon to automatically expand the archive. After the install process, the install file will be deleted automatically. Do NOT deinstall a previous version. Thus already saved data will not be lost.

## User's Guide:

### Main Screen

When opening the “Single-Value“ input screen a new record will be made up automatically.

### General Information

Please insert the most important general information.

Date	Time	S.	D.	P.
1/9/04	7:22 pm	116	81	93
1/5/04	10:21 am	117	86	74
1/2/04	8:20 am	131	85	87
12/30/03	1:00 pm	137	74	86
12/26/03	8:20 am	145	94	91

At the bottom, there is a home icon, a bar showing 'A.: 129/84 ; 86.', and a print icon.

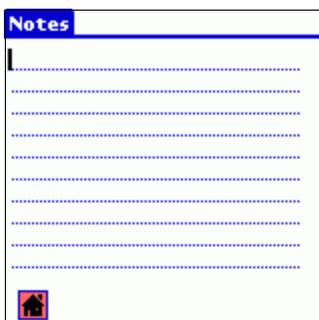

### Blood Pressure Values

When making a new entry the current date/time will be automatically registered. A manual change is of course possible.

The table allows a filtering (*you can edit the condition*) of the entries.

The average value will be automatically determined.

### Notes

For “this and that“

## Reminder

Let it remind you of taking your medicine, your next test, etc.

## Problems:

Requires PalmOS 3.5 (or above).

This applicaton was tested on the Palm Vx (OS 3.5, black/white), Palm M505 (OS 4.0, coloured), Palm Tungsten (OS 5.0) and with the Palm OS Emulator. I haven't found any problems which would cause a crash.

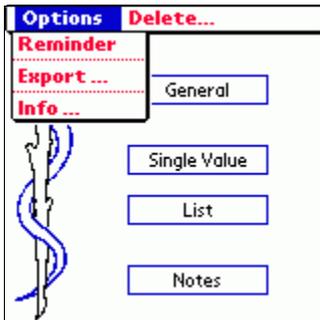

## Frequently Asked Questions (FAQs):

-Is it possible to run the application from SD/MMC-Card?

Please avoid installing this program on SD-cards and similar devices. This is only a recommendation, because I received SINGL reports about problems connected to this subject.

-Where is the alarm-function?

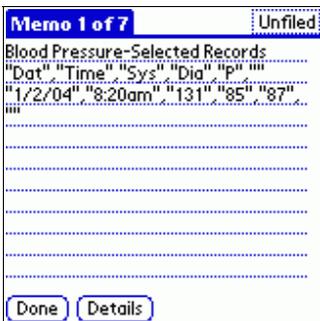

There is no button for it; you will find it in the menu of the Main-Screen.

-I would like to print my data?!

Please choose "Export DB" in the main menu. After a comparison of the data (hotsync) it can be printed from your desktop applicaton. The data can be exported to spreadsheets when it has been saved as a \*.txt or \*.csv. It is possible to export selected or ALL records

After the printing you can, if you like purge your database (>Menu>"Delete")

Example of exported records

## Other way to export your data

There is a nice tool for exporting the data to the computer yet: "PDB Explorer" (<http://ilusoft.cjb.net/>). With it you can print, resort and make a \*.csv for an import into a spreadsheet (Excel). It is freeware. The database for your blood pressure values is "MyRR.pdb". You will find it in your Palm backup folder.

But be careful: with PDB Explorer you can change things that the program will not recognize the database any longer!!!!!!!!!!!!!!!!!!!! ( "Files" > "Properties")!!!!!!!!!!!!!!!!!!!!

**Restriction of Shareware-Version:**

- No average calculation
- Filter function disabled
- No "Purge Records"
- No "Export to Memopad"

**License:**

MiniBloodPress is Shareware. If you find it useful, please register it at PalmGear (<https://secure.palmgear.com/sc/buy.cfm?prodid=15632&buytoken=24370922>). It only costs \$6. Then you will get the full version.

This software is provided without warranty. Use it at your own risk. I will not take responsibility for any form of damage or loss that occurs using this software.
