## Installation

Load the file **ZMoto v7.1.3.prc** to your handheld (refer to your handheld's user manual for more information on installing Palm® programs). The first time you install ZMoto the installer will unpack the necessary files before launching the application.

**NOTE:** This version is for previous\* and first time users. ZMoto v7.1.3 requires Palm® OS 4.0 minimum and a color compatible device.

\*Some settings may need to be re-entered after upgrading. As well, given the new method of creating service records, the service list database will be overwritten. As well previous oil and tire records will have to be re-created.

## Managing Service Entries

To create a new record select **New** and enter the service. You can select your mechanic as well and add additional info by selecting the **Details** button.

ZMoto comes with a pre-installed database of common service operations. You can change them by selecting **>>Edit Services** from the service popup.

### Oil Entries

Create a new record then select **Oil Change** from the service popup. Select the **Details** button and add the amount, type and weight of oil installed. As well you can keep track of additional oil added after the change.

### Tire Entries

Create a new record then select **Tire Change** from the service popup. Select the **Details** button and add the size, brand and make of tires installed oil.

## Scheduled Services

You can create alerts for your upcoming scheduled services. To do so select the **Edit** button from the Scheduled Services form. You can change the due dates as well. You will be alerted 300 miles/km before the scheduled services due date.

## Managing Fuel Entries

Select **New** and enter your odometer reading\*, amount of fuel filled and fueling cost. Then on your next fill up your ready to create records.

\*You can change the default mileage setting from Odometer to Trip Meter by selecting **Options>Preferences** from the menu on the start form

## Managing Part Entries

To enter your parts for your bike select the **New** button from the MotoParts form. Then select your part and add any other info. As well you can select the status of the part – installed, extra, used or back order.

## Managing Trip Entries

Select **New** from the MotoTrip form and enter your destination. Then enter your **Starting** odometer reading. When your trip's finished enter your **Ending**. You can store food and lodging costs as well. If you created fuel records during your trip the average MPG and costs will be displayed.

## Exporting Records

You can export your ZMoto databases by selecting **Options>Export Records** from the menu. Select the type of record you want to export – Memo Pad, DOC or CVS file.

There are several third party Palm® programs (*Wordsmith*® for example) that allow you to export your Memo Pad or DOC records to your computer. For more information contact: [http://www.bluenomad.com/ws/prod\\_wordsmith\\_details.html](http://www.bluenomad.com/ws/prod_wordsmith_details.html)

## Preferences

You can change the default settings by selecting **Options>Preferences** from the menu.
