

## Using Simple Tunes for Pocket PC

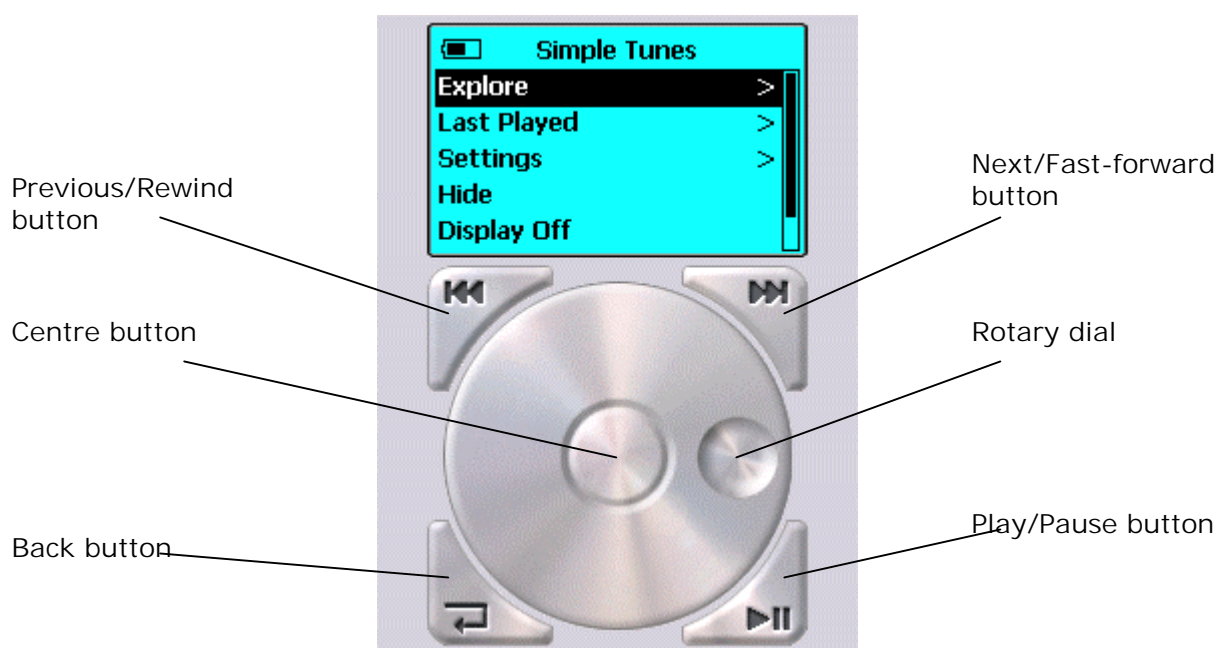

Simple Tunes is a personal MP3 player for your Pocket PC. Browse and play MP3's anywhere on your Pocket PC including the storage card. It has been designed to be the simplest to use MP3 player available. Just browse to your MP3's and play them.

### Simple Tunes Controls

When the Simple Tunes starts you see the main menu.

To navigate Simple Tunes move the rotary dial clockwise and anti-clockwise. To select an item press the centre button, and to move back press the back key.

### Display Off feature

Select Display Off to turn your device display off and save battery life. To turn the display back on press any button on you device's directional pad.

## Playing Screen

Whenever a track is playing or paused you can view the playing screen.

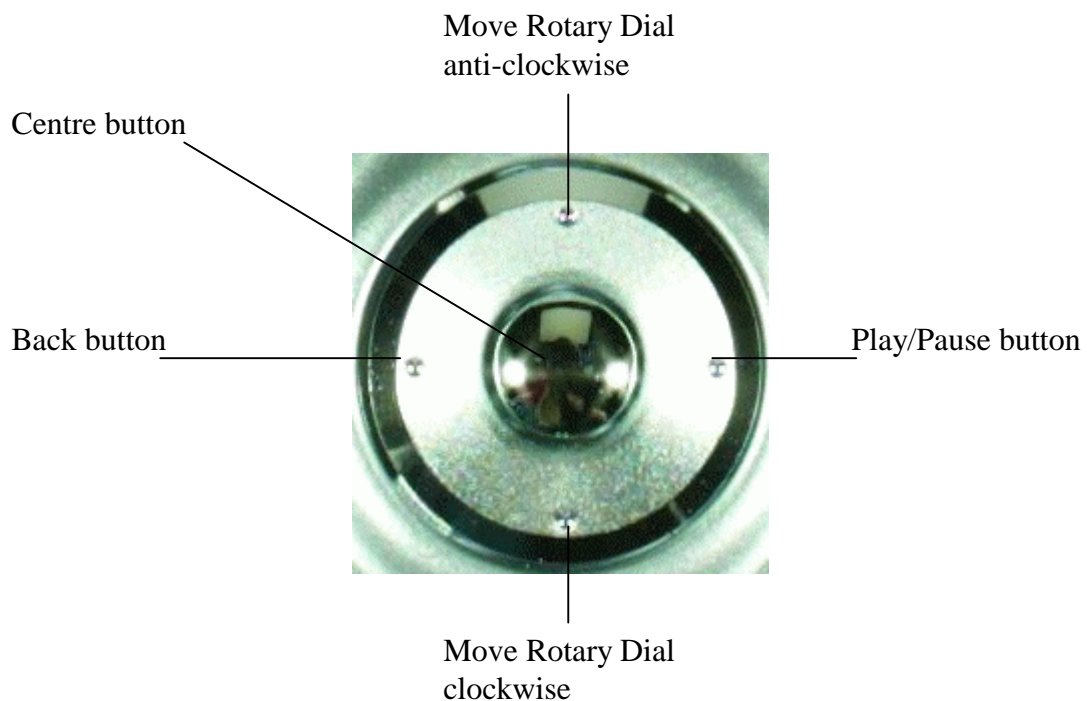

To increase / decrease the volume move the rotary dial in a clockwise / anti-clockwise direction whenever the Playing screen is visible.

To skip through a track, press the centre button, and then move the rotary dial whenever the Playing screen is visible.

Tip: Whenever a track is playing just tap the list on the display to jump to the Playing screen.

## Hardware Controls

Simple Tunes can be controlled entirely from the hardware keys as follows:

### **Listening to Your Music**

Record or download MP3's to your desktop. Then copy your MP3's into the desired folders on your Pocket PC (including the storage card). Each directory on your Pocket PC that contains MP3's will be treated as a play list by Simple Tunes. Simply use Simple Tunes to browse to an MP3 and press the select button to start playing.

### **Audio File Formats Supported by Simple Tunes**

Simple Tunes supports MP3 audio files only.
