install Air Strike Fighter 1.0. To install Air Strike Fighter 1.0 from an IBM type PC, the following applies:

Air Strike Fighter can be installed like any other Palm application with the Palm Install

Tool:

- Launch the Palm Install Tool.
- Select "Add".
- Find the file AirStrikeFighter.prc where you unpacked/unzipped
- Do a HotSyn...

Must read

- The Air Strike Fighter 1.0 Setup utility and Air Strike Fighter 1.0 only work on IBM type PCs, not on Mac type PCs.
- After installing Air Strike Fighter 1.0 from a IBM type PC on your handheld, you invoke Air Strike Fighter 1.0 on your handheld by tapping on the Air Strike Fighter 1.0 icon on the applications launcher.

- If you have previously installed the Shareware version, and wish now to install the registered version, DO NOT delete the Air Strike Fighter 1.0 application from the handheld (unless, of course, you were just experimenting and want to start over again) – this would delete the program AND your data as well.

Simply install the registered version of AirStrikeFighter.prc, and it will continue to work with the database you created with the shareware version. The Air Strike Fighter 1.0 database has been designed so that future releases of Air Strike Fighter will be able to work with an existing database from a previous release.

- The registered version of Air Strike Fighter 1.0 is a different program file than the shareware version. If you have installed the registered version, do not install a more recent shareware version; it will not be registered, and you will lose the additional functions of the registered version. However if you so desire to try out the Demo version of the update, you should take backup of your existing data and then install the .prc. In this case you will not lose the existing data and once you decide to install the updated registered version you can retrieve the saved data. If you are entitled to a free update, it will be emailed to you.

Backup Your Files

Don't forget to keep backup copies of your AirStrikeFighter.prc, as it will contain the crucial data of your day-to-day activity. We recommend user to keep backup of .prc time-to-time. Especially be sure to do this before installing a new version (if you buy

or you are entitled for free updates from Palm House) in future – this will enable you to return to your current situation without difficulty in case you run into any problems with the new release.

If for any reason you need to return to an earlier version of Air Strike Fighter, it is best to delete Air Strike Fighter completely, and then reinstall the .prc files.
