

# MileageX – Created by PDAsftnet.com , January 20, 2003

## Overview

This little program will let you record all your car mileage with very easy to use interface. We are working on the desktop program for you to input/edit/export /print the data from your Windows PC.

## Installation

Please install all three PRC files to your PDA.

## Getting Start

The screenshot shows the main interface of the MileageX application. At the top, there is a title bar that reads "MileageX - PDAsftnet.com". Below it is a "Category:" dropdown menu. A table with three columns is displayed: "Date" with up and down arrows, "For", and "Mileage". The table contains two entries: "1/20/03 go to work 123" and "1/3/03 go to airport 29". At the bottom left is a "New" button, and at the bottom right is a "Total:" field showing the value "152".

Date ↑↓	For	Mileage
1/20/03	go to work	123
1/3/03	go to airport	29

New Total: 152

Tap on button “NEW” to start input the record

Tap on the total field to update the running total

Tap on the category dropdown on top to filtering the record by specific categories

Tap on the UP or DOWN arrows beside the date to sort the record in ascending/descending order

The screenshot shows the detail screen of the MileageX application. At the top, there is a title bar that reads "Detail - PDAsftnet.com". Below it are input fields for "Date:" (showing "12/19/03"), "Category:" (showing "Business" with a dropdown arrow and a "+" button), and "For:" (showing "go to airport"). Below these are three rows of statistics: "Begin:" with the value "23523", "End:" with the value "23552", and "Total:" with the value "29". At the bottom are four buttons: "OK", "<", ">", and "Del".

Date: 12/19/03  
Category: Business  
For: go to airport

Begin: 23523  
End: 23552  
Total: 29

OK < > Del

For the first time, you should define some of category by tap on the button “+” and it will bring you to the categories section.

Tap on the keypad to bring up the large numeric keypad for easy input.

You can define unlimited # of categories here
