## **1.0 Introduction**

iRemind help to remind your friends and yourself of important dates, appointments or events via the Short-Message-Service (SMS) of the GSM network. The system is very user-friendly and easy to use.

## **1.1 System Requirements**

- XDA O2 or XDA O2 II PDA.
- GSM subscription.
- iRemind software .

## 2.0 Using iRemind – Entry

Operating the iRemind consists of 5 simple steps.

Step 1: Select the date.

Step 2: Select the time.

Step 3: Enter the mobile numbers (use “;” for multiple numbers.).

Step 4: Enter the message.

Step 5: Click the “Remind” button.

## 2.1 iRemind - Entry Module

## 2.2 iRemind – Reminder List

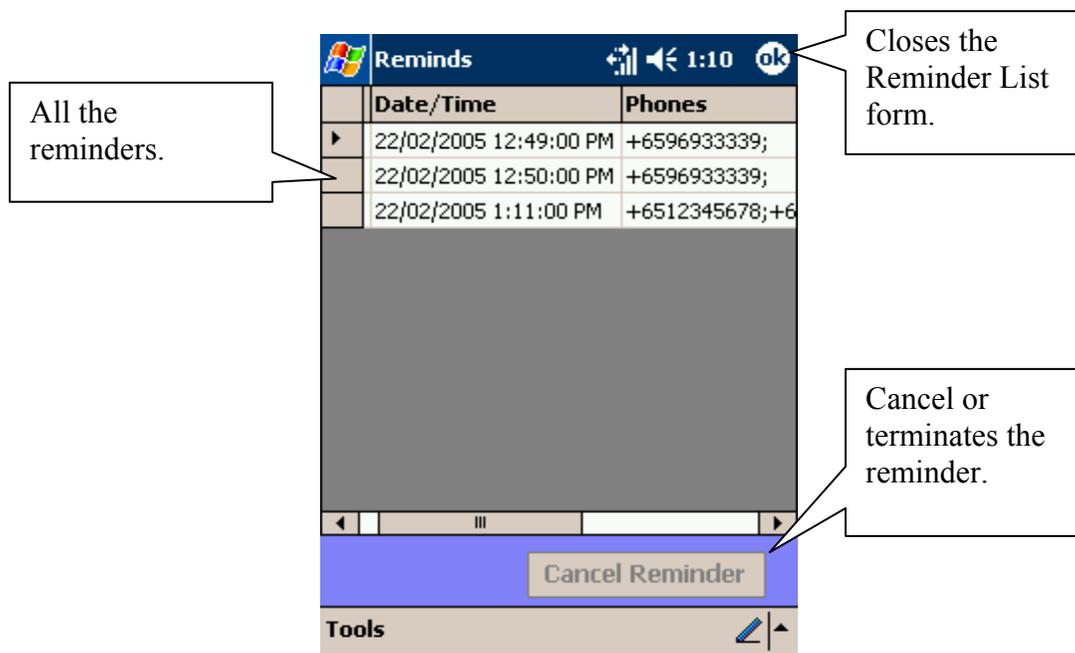

Figure 2

Figure 2 shows the list of reminders – pending, partial, sent or failed.

- Pending – Reminder still waiting to be sent.
- Partial – Not all mobile numbers were sent successfully.
- Sent – All mobile numbers are sent successfully.
- Fails – Reminder failed to sent to all mobile numbers.

## 3.0 iRemind Configuration

iRemind comes with settings that user can customize to individual preferences. In the configuration module, there is also a tab for you to register the product with the product key.

### 3.1 Configuration

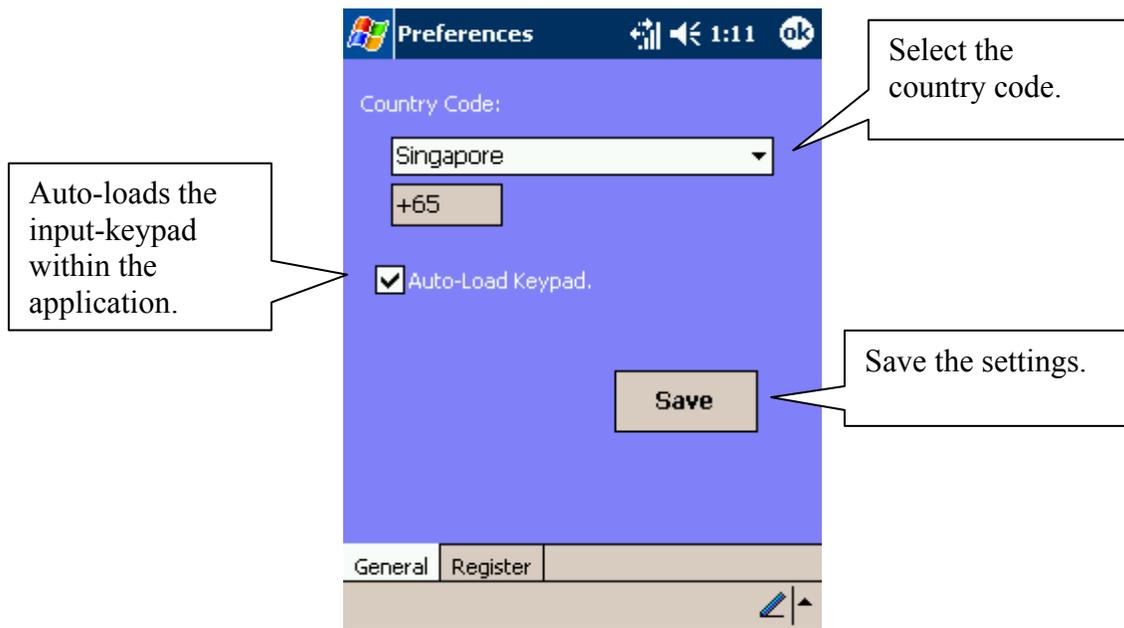

Figure 3

Figure 3 shows the first tab of the preferences form. This form allows you to perform quite a number of settings.

- Country Code – this is required to send the SMS successfully.
- Auto-Load keypad– if checked, the application will load the keypad whenever it focus an entry box.
- Save – remember to save before exiting the module.
